**In general, the following applies**

**Standard (56.99244)**

Most houses take the standard bulb - shape is oblong  
The voltage is 110 - our US standard voltage  
The cord does not have an adapter, just a regular bulb  
Comes in different colors

**3 Volt (56.53121)**

Houses with LED lights on the outside or sound take 3 Volt  
LED lights are delicate, higher power would burn them out  
The adapters step down the power to protect the LED lights  
The 3 Volt bulb is a low voltage bulb  
Shape is Pear shape  
Comes in different colors

**12 Volt (56.53161)**

Houses with animation require the 12 Volt bulb  
Motors are also delicate, higher power would burn them out.  
This is slightly higher voltage than 3 Volt, to turn the motor  
The 12 Volt is a low voltage bulb  
Shape is arrow head  
Comes in different colors.
